### EXAMINER'S COMMENT

1. Applicant's RCE was filed in 1/4/2008. The RCE included an information disclosure statement. The examiner has considered the references and asserts that the cited art does not change the allowability of the claims.

The translation of foreign documents DE 198 53 554 C1, DE 198 53 555 A1 and DE 198 53 556 C1 generally concern the use of a combustion powered tool. The tool does disclose a pressurized container holding the fluid, but describes none of the patentable features of the pressurized container as claimed by applicant.

Riebe (US 6,644,306) generally concerns the use of a valve for pressurized containers used in respiratory inhalers. Riebe does not disclose the biasing element located between the fuel metering chamber and the second end of the valve body. Riebe also does not disclose the use of a separate fuel container and a valve stem located within the mixing chamber and having a variable contour along the outer surface.

Rosenbaum (US 6,681,955) generally concerns the use of a pressurized container having a separate container section and a valve stem. Rosenbaum does not disclose a mixing chamber and a valve stem located within the mixing chamber and having a variable contour along the outer surface.

2. Claims 1, 2, 5-7, 9-15 and 17-23 are allowed.

***Conclusion***
